## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 5, 7-13 and 15-23 allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose, or suggest, either alone or in combination a galvanometer scanner comprising a partial rotation torque motor with a shaft supported within one micro-radian of axial precision between two non lubricated ceramic ball bearing assemblies. Niwa (JP2002174249A, US 6589448) discloses a motor comprising a ceramic ball bearing where the coefficients of expansion between the ball and the races are small, but Niwa et al. does not anticipate Brown. Therefore, the limitations contained on claims 5, 7-13 and 15-23 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
